# THE SOCKS

SAY IT ALL.

## **Our therapist Kim Fusinaz wore fun, colorful socks that made her young patients smile.**

When she faced extended illness, Kim's co-workers worked extra hours to cover her shifts and save her position. Today, four years after her valiant fight ended, the team holds an annual fundraiser in her memory. Complete with special socks.

That's the way we care – for patients and each other. Join our team as an Occupational Therapist, and experience strength in compassion.

Here, you'll play a vital role in our pediatric rehabilitation program covering the full continuum of care. We work with diverse conditions and involve the family. We give talented therapists opportunities to explore a variety of options for an inspired career.
