

MedBytes

A weekly physician communication

In this edition:

1. Changes to infant formula, oral electrolyte
2. Reminder: Register for June 9 Asthma Summit
3. Transfer Center updates documentation tool
4. PowerPoint presentation templates
5. Electronic health record training
6. CME opportunities

1. Note changes to infant formula, oral electrolyte

Starting Wednesday, June 6, Children's will provide infant ready-to-feed formulas and oral electrolyte solutions from Mead Johnson to our patients. Products include Enfamil and Enfalyte. Contact [Tracie Johnson](#), Nutrition Coordinator at Egleston, or [Kelly Vieira](#), Nutrition Coordinator at Scottish Rite, for more information. Also note that:

- After an extensive review, Children's determined that Mead Johnson offered the best quality and variety of options.
- We will no longer place ready-to-feed Abbott products, including Similac, in Omnicells. They are only available by special request.
- Physicians will still be able to request special orders.

2. Don't forget: Pediatric Asthma Summit, June 9

Children's and Not One More Life will host a citywide summit, Saturday, June 9, 8 a.m. - 2 p.m., to address pediatric asthma management in the Atlanta metropolitan region. Recently, five children died and two more suffered severe brain injuries as a result of uncontrolled asthma. Join your colleagues in education, discussion and planning sessions to identify strategies to improve pediatric asthma care in our community. [Register](#).

The program features:

- LeRoy Graham, M.D., Founder and Medical Director, Not One More Life
- Anne Fitzpatrick, P.N.P., Ph.D., Assistant Professor, Department of Pediatrics at Emory University School of Medicine
- Ann-Marie Brooks, M.D., Medical Director, Asthma Center, Hughes Spalding
- Leonard Fromer, M.D., Executive Medical Director, Group Practice Forum (GPF)

3. Transfer Center to implement improved documentation tool

Starting Friday, June 1, the Children's Transfer Center will implement an improved

documentation tool designed to enhance our facilitation of referral calls and improve end-result reporting. Developed in partnership with the Children's IS&T department, it offers:

- Increased data organization capabilities, helping the Transfer Center better manage all transfers and direct admissions at our locations
- Enhanced reporting capability
- Better-designed report features
- Algorithms for specific service lines, allowing for a tailored experience based on each incoming request
- Wider scope of ED expectant information
- Referring physician preferences and requests

Continue to follow the same procedures for contacting and interacting with the Transfer Center. Contact [Cheryl Stokes](#), 404-785-8906, with questions.

4. New presentation templates

Visit the Physician Portal for [PowerPoint templates](#) that are designed for a physician audience. You are encouraged to use them for presentations and conferences, and to allow [Jen King](#), Marketing Coordinator, to review the document prior to your presentation.

5. Electronic health record training coming soon

In the coming weeks, Children's will offer short, online training sessions on topics accessCHOA users ask about most. The service is a free, secure, Web-based electronic health record system that provides instant access to your patients' information. [Share your preferences](#) for the online training sessions you would like to see. Learn more about the service and stay updated on [accessCHOA news and resources](#) through our website.

CME Opportunities

Visit [our Continuing Education page](#) for details about events, such as conferences and Grand Rounds, as well as online modules to earn CME credit.
