## Congratulations DAISY Award Winners

Congratulations to DAISY Award winners **Karen Cohen** and **Lisa Egan**. The DAISY Award recognizes nurses for their commitment to the highest standards of nursing and for making a difference in the lives of the patients and families we serve.

**Karen Cohen, Nurse Case Manager, Case Management, Children's at Scottish Rite**

After 22 years of service, Karen Cohen still sets the perfect example of what a nurse should be. As a nurse in the TICU at Children's at Scottish Rite, she constantly puts patients' needs ahead of all else and provides the very best care possible. The patients in the TICU often require extreme attention to detail for their care to be continued when they leave the unit. Karen handles this task with first-class expertise and care. A true team player, Karen regularly interacts with the multitudes of students, externs and nurses who are new to the unit during orientation. She does it with an uncommon skill and ease. Karen's extensive experience also brings unmatched critical thinking and leadership skills to the unit. She co-chairs the unit's Project TICU committee and is an Epic Champion. Karen also participates in bereavement care and is supportive to patients, families and staff members throughout the process. She continually provides care as a primary nurse, and she guides her patients and their families through their time in the TICU with great care and compassion. Karen is a tremendous asset to both the TICU and Children's.

**Lisa Egan, Staff Nurse-Resource, Radiology Sedation, Children's at Egleston**

Lisa Egan is a role model to her fellow staff members in the Radiology Sedation unit at Children's at Egleston. A natural leader, Lisa steps up and makes decisions autonomously that affect patient care and patient flow in Radiology. When the assistant manager took a week off, she made sure the department ran smoothly. She came in extra just to ensure patient flow was efficient and that staff had the resources they needed to get the job done well. She obtained—and has maintained—her CPN and recently received her moderate sedation certification. Lisa is active on the Patient and Family Centered Care CHOICE committee. As a Magnet champion, she has played an integral role in the organization's journey to achieve Magnet status. Through all of these things, Lisa demonstrates dedication to excellence in patient care. Lisa also has excellent clinical, critical-thinking and decision-making skills, and she consistently focuses on meeting the needs of patients and their families. Lisa makes a difference everyday in the lives of the patients and families that come through Radiology for diagnostic procedures and treatments.
