News

Changes to Insurance Coverage for Rehab

Peach State, Wellcare (as of May 1st) and Amerigroup (as of June 1st) patients who require physical, occupational and speech therapy for treatment of a chronic condition may not receive services through Children's. Children's can still evaluate all patients with Medicaid CMO funding, regardless of acute or chronic condition. Those patients with chronic conditions who need treatment following evaluation will need to be referred to a Children's Intervention Services (CIS) community provider for therapy. There are no changes in coverage for therapy services for treatment of an acute condition. For more information, please contact Outpatient Rehab case management at 404-785-8754.

Making Medicine Safer

March 4-8 marked National Patient Safety Week. At Children's, we participated in a citywide Code Green, or mass casualty, drill. These drills identify gaps in our processes, operations and communications. Often, the biggest breakdowns occur in how we organize ourselves, delegate tasks and keep teams updated to prevent errors.
