Gov. Deal and Children's Make Triple Play for Child Wellness

Children's, Gov. Deal Launch SHAPE Program Statewide to Tackle Childhood Obesity

On May 9 at White County Intermediate School, Gov. Nathan Deal launched **SHAPE**, a unique public-private partnership to promote childhood fitness and build a culture of wellness among Georgia's youth. As the largest pediatric healthcare provider in the country, Children's sees the impact of inactivity and poor nutrition every single day. That's why we're an active participant in the Georgia SHAPE Partnership.

With other Georgia organizations, we can come together to solve the childhood obesity crisis. SHAPE will capture and track data about the fitness levels of Georgia's school children and get schools excited about participating. What's more, once fully launched, the Children's **Strong4Life** program will be able to use this data to strengthen programs that empower families and children to make simple nutrition and activity changes in their lives, one positive step at a time.

"Georgia has one of the worst rates of childhood obesity in the nation," said Gov. Deal. "We know that childhood obesity decreases academic performance, increases the chances of sickness and disease and shortens life expectancy. We face a health care crisis in Georgia resulting from poor diets and lack of exercise. But the good news is that this problem is fixable. The SHAPE partnership is an innovative approach to getting Georgia kids fit and on a path to healthy living."

SHAPE generates data through Fitnessgram, an assessment that measures the strength, flexibility and endurance of students in P.E. classes. Sophisticated data management helps kids and parents chart improvement. The benefit of Fitnessgram is that it does not reward specific athletic skills or promote a particular body image; it determines fitness. The test results reveal slim children who are not physically fit as well as heavier kids who are.

SHAPE will expand statewide after attaining successful results from five pilot programs in White, Hall, Gwinnett, Bibb and Lowndes counties this school year. The program is a partnership of Gov. Deal, the Arthur Blank Foundation, the Georgia Department of Education, the Department of Community Health and the Division of Public Health, Children's, the Atlanta Falcons and the Atlanta Braves.

Gov. Deal Works with Children's to Sign Booster Seat Bill

Children's Recognizes May Catch Me at My Best Winners
Congratulations to the following employees for winning this month's Catch Me at My Best drawing for a Children's duffle bag.

Children's Announces

This legislation, which is set to become effective July 1, will require children to be properly restrained in a child passenger safety restraint device until they are 8 years of age. "It is important that we protect the lives of our children by ensuring every young Georgian is properly secured while riding in a motor vehicle," said Deal.

A child is exempt from the law if one of the following is true:

- The child is at least 4 feet, 9 inches tall.
- The child has a written statement from a physician for a medical condition.
- The child weighs 40 pounds or more, and the available lap and shoulder belts are being used to properly restrain other children.
- The child weighs 40 pounds or more, and the vehicle is not equipped with both lap and shoulder belts.

Increasing the child passenger safety restraint age was one of the top legislative priorities of Children's Government Affairs team during the 2011 state legislative session. Government Affairs worked to have bills (SB88 and HB 279) introduced in both the House and Senate and secured the support of 55 legislative sponsors. Both bills passed their respective chambers and Children's Government Affairs team ultimately worked with House leadership and lobbied for SB88. Safe Kids Georgia also worked with Government Affairs, playing a critical role by providing behind-the-scenes support through grassroots efforts across the state.

Gov. Deal Signs Proclamation Recognizing Food Allergy Awareness Week

Gov. Deal also recently met with Karen DeMuth, M.D., an Emory-Children's Center physician in Pulmonology and Allergy, and other other representatives from the Food Allergy Kids of Atlanta to sign a proclamation recognizing Food Allergy Awareness Week.

Dr. DeMuth's work will help educate the public about the dangers of food allergies. For more information about this meeting with the Governor, visit www.foodallergykidsatl.org.
