Complete Employee Engagement Survey by July 15

On June 25, Children's launched an online employee engagement survey. Your responses will help leaders continue to make this a great place to work.

You should have received a personalized email from Web.HR inviting you to take the survey (employed physicians received an invitation from Internal.Communications@choa.org). To help get your feedback to the right set of leaders, the survey contains five demographic information areas:

- Facility in which you work
- Department in which you work
- Work area within your department
- Your immediate supervisor
- Your current role

The email also contains the link to take the survey, which is open through July 15 at the end of the day.

All responses are completely confidential. Children's is ensuring this anonymity in two ways:

- No code that can be traced back to you is used. That's why we're asking you to complete the five demographic questions.

- A leader will not receive a report unless there are five or more respondents in a particular demographic category. For example, if there are only three people in your group with the same role as you, your manager will not receive a report based on your role. This same minimum level of respondents, five or more, is used for every demographic report.

If you have questions about this survey, contact the HR Service Center at ext. 54747.

Thank you for your participation. Your feedback will help make Children's an even better place to work.
